

“TOW-ROPE RETRACTING SYSTEM LANGENTHAL“

Big rugged rope wheel designed for ropes up to 9mm diameter and lengths up to 70m

Space sparing and easy installation in the aircraft body

Short rope retracting cycles even at high air-speed
Rope retracting guaranteed at speeds up to 250km/h

Integral tail support with rope pullout sensor, loop system for emergency release and hard points for mounting an optional standard bolt

For an offer please contact:
AIRLA Flugzeug Service AG
E-mail: info@airla.ch

Electro motor with 245 watt power and sufficient torsional spare for an effective operation

Special rope end piece minimizes rope rips with heavy gliders (850kg)

Indicator with an automatic system shut-down after retracting, including an integrated adjustable rope length indication

Easy manual rope pullout (max. 4 daN)

Minimal equipment weight permits the installation of the system also onto eco-light aircrafts (UL)
